Contributor

## PERSONAL PROJECTS

Zero to Mastery (03/2019 – Present)

Student-Alumni

---

Advanced-React-CLI (06/2019 – Present)

- A Command Line Interface developed by Dev Isle - a developer community I contribute to.
- Gives user options for starting a new React application such as: installing create-react-app, react-router, redux, node-sass, typescript, and more. The purpose is to make creating a custom React app more fluid by automating the installation of packages and numerous boilerplates.

E-commerce clothing store (06/2019 – Present)

- Tech Used: React, JavaScript, Firebase, Redux, GraphQL, React-Dom, React-Router, React persist, HTML/CSS/Sass, Reselect, Node.js, Stripe API.
- Full fledged e-commerce web app with sign in w/Google, stripe integration for payments, locally stored data for cart and checkout, and reusable components.

My Portfolio Website (06/2019 – Present)

- Created my personal portfolio using React, JavaScript, Bootstrap, JQuery, HTML/CSS, and JSON. Used a
- JSON data file to make the React components reusable as a template. Added animations using
- translate3D in CSS.

Robo Friends Rolodex (06/2019 – 06/2019)

- Tech Used: React, JavaScript, Node.js, HTML/CSS, React-Dom.
- Rolodex of Robot users with an input search bar to filter through.

Face Detection App (05/2019 – 06/2019)

- Tech Used: React, JavaScript, HTML/CSS, Clarifai API, PostgreSQL, Node.js, Express.
- The web app contains sign in and register options, a number of entry counter, image url submission form, and the face detection api powered by Clarifai.
